TYPED SOURCE EXCERPTS

R01 / before editing

"2 portions. 150 g frozen peas. 2 thick slices bread. 1 tbsp olive oil. 1 tsp lemon juice. 1/4 tsp lemon zest. 2 tbsp water. pinch salt. Peas in pan with water, 4-5 min until hot + tender. Mash with oil and lemon, leave some whole. Toast bread, peas on top."

R03 / a detail we cannot silently complete

"2 portions? ... Plain yogurt [quantity unreadable in source scenario] ..."

The missing quantity and uncertain yield are retained as questions. A likely amount would still be an invention.

These are invented typed notes, not a handwriting-recognition result. The full editable notes are included separately.

Yield:
TO CONFIRM
Source says "2 portions?"

METHOD

01 **Draft sequence only.** The recipe is incomplete and is not ready to use.

02 The source describes stirring yogurt with honey, then dividing it between bowls.

03 The pear, oats and cinnamon are added on top. Retain this order after the owner confirms the missing details.

EDITORIAL NOTE

Fictional recipe. Not kitchen-tested. No nutritional, allergen or food-safety review is claimed.

BEFORE A FINAL EDITION

A short list of honest questions.

Good editing leaves a clear trail from source to finished page.

R03 CONFIRM

How much plain yogurt?

The source scenario has an unreadable quantity. No amount has been substituted.

R03 CONFIRM

Does this make two portions?

The question mark in the note is preserved as an unresolved yield.

R01 / R02 CHECKED

Were all listed amounts retained?

Ingredient amounts, timings and sequence match the invented source notes.

ALL CONFIRM

Are recipe names and attributions right?

The demo uses invented titles and the fictional name Rowan. Real attribution requires owner approval.

ALL CONFIRM

Is this ready for print?

Paper size, printer margins, image permissions and the final proof would be agreed before ordering.

ALL NOT DONE

Were the recipes kitchen-tested?

No. This sample demonstrates transcription, organization and page design only.

Delivered with editable source notes. No printing was ordered. A real project would preserve original scans and require the owner's approval of uncertain text.
